Learn how simple it can be to have a stunning water pond or feature installed today!

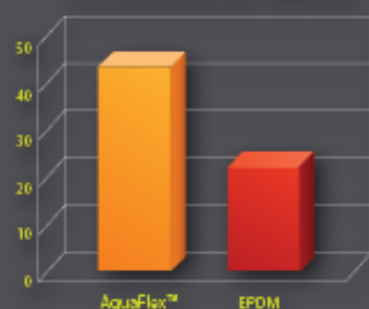

HOW DO EPDM LINERS COMPARE TO AQUAFLEX?

Tensile Strength (LBS) - ASTM D5693

Aquaflex™ - Nearly 2x the strength

Puncture Resistance (LBS) - ASTM D4833

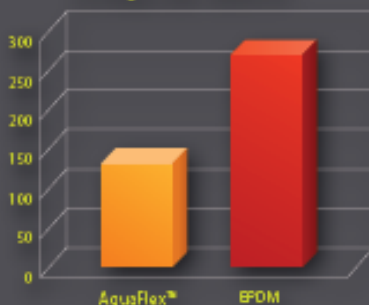

Aquaflex™ - Nearly 2x the puncture

Elongation at Break (%) - ASTM D 6693

Aquaflex™ - Triple the elongation

Unit Weight (LBS) - ASTM D751

Aquaflex™ - Half the weight of EPDM

AQUAFLEX™ POND LINER

AquaFlex™ Pond Liner combines durability and flexibility into a fish-safe thermoplastic polyethylene based membrane. Ideal for residential or commercial water features, recreational, and creative custom designs.

AQUAFLEX™ POND LINER FEATURES:

- High Impact Resistance
- Flexible and Conforming
- Excellent Outdoor Longevity
- 10-Year Material Warranty
- Low Maintenance
- Easy Installation
- Environmentally Safe
- Fish Safe Polyethylene

TYPICAL APPLICATIONS:

- | | |
|------------------|---------------|
| Backyard Ponds | Streams |
| Koi Ponds | Fountains |
| Decorative Ponds | Water Falls |
| Aquatic Habitats | Water Gardens |

POND LINER AVAILABILITY:

- | | |
|----------------------------|--------------------------|
| Wide range of stock sizes. | Custom fabricated sizes. |
| Quick simple installation. | Worry-free maintenance. |

AQUAFLEX™ UNDERLAYMENT

AquaFlex™ underlayments eliminate problems of determining the aggregate gradation required to match current soil conditions. This heavyweight underlayment is often used in critical subsurface drainage systems, soil separation and permanent erosion control.

AQUAFLEX™ UNDERLAYMENT FEATURES:

- High Impact & Tear Resistance
- Conforming to Soil or Surface
- High-Water Flow & Soil Retention
- Cost-Effective Alternative

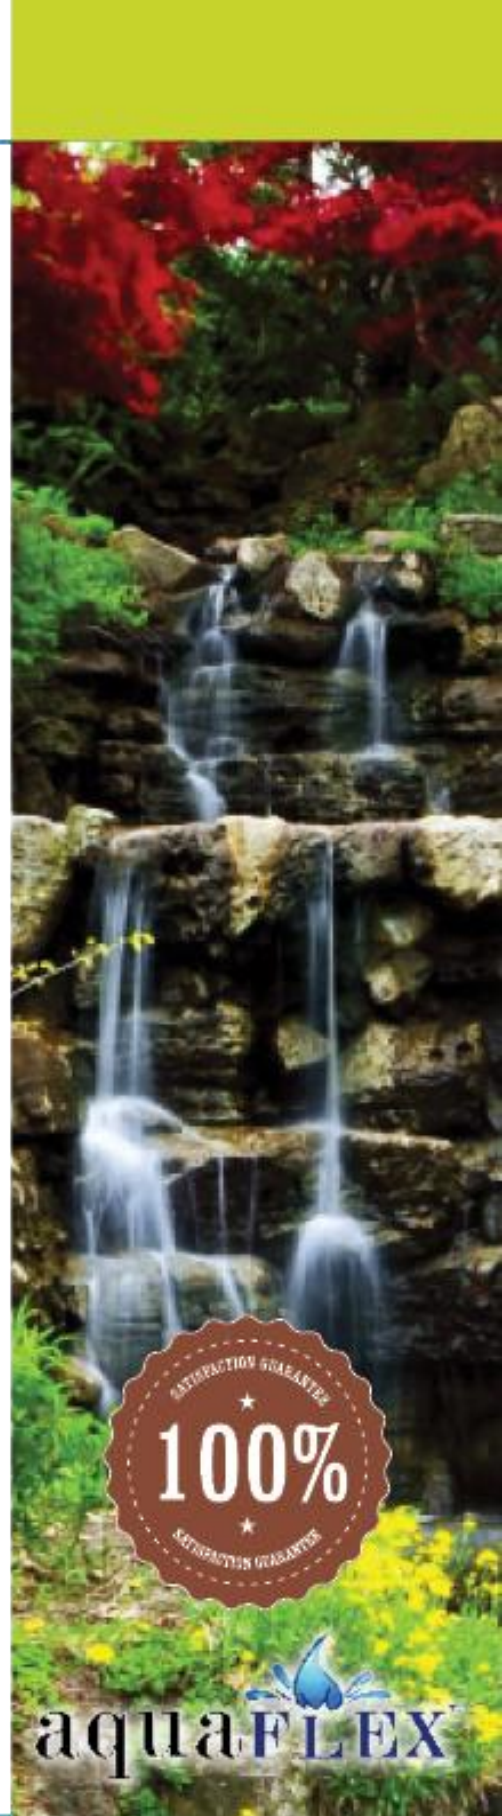

TYPICAL APPLICATIONS:

Decorative Ponds	Subsurface Drainage
Under Airfields	Embankments Drainage
Athletic Fields	Water Features

AquaFlex™ Underlayment is an extremely cost-effective solution to graded-aggregate filters. AquaFlex™ replaces the hassles of finding a convenient and economical source of specific aggregate gradation, transporting and placing graded aggregate, and assuming the aggregate gradation provides effective filter performance.

**AQUAFLEX™ - YOUR SOLUTION
FOR CREATIVE SPACES.**

WHY AQUAFLEX™ POND LINER IS THE RIGHT CHOICE ...

AquaFlex™ is an extremely flexible thermoplastic polyethylene based pond liner that encompasses the strength of polyethylene liners along with the highest flexibility available, far exceeding EPDM.

AquaFlex™ is fish safe and ideal for backyard water gardens and Koi ponds. Helps to keep ponds healthy for plant and animal life, and to avoid leaks and composition changes in the water.

DO-IT-YOURSELF PROJECT

AquaFlex™ is ideal for small, yet creative pond and water feature designs. With the right materials, you can create the backyard oasis you've always dreamed of having. Easy to install, plus worry-free maintenance.

AFFORDABLE & BEAUTIFUL

AquaFlex™ allows you to create a pond in any shape you desire, from kidney shapes to natural-looking streams. Use your imagination and AquaFlex™ pond liner to make a truly unique design you'll enjoy for years to come!
